# TMS7

TMS7 is a user-friendly terminal management hub that provides load rack visibility and control. With nearly 30 years in the market, Toptech's TMS is globally known for its reliability and flexibility and TMS7, the latest version of TMS, furthers this reputation with even more productivity and controls.

EXPERIENCE UP TO 60% MORE PRODUCTIVITY

TMS7 brings terminal management to a whole new level, offering a significant boost in productivity, a user-friendly interface, superior security and fast, easy upgrades. TMS7 can handle a variety of terminal applications and an unlimited number of drivers, carriers, and customers. Use TMS7 as the hub to access terminal analytics, allocations management, customer onboarding tools, and so much more. Experience as much as a 60% increase in productivity from your former TAS system with TMS7's superior user interface and additional features.

PROBLEM

More and more companies are wanting to access their TAS system using nontraditional methods such as mobile devices and websites. However, most TAS systems still require deployed applications on PCs. In addition, companies often find themselves maintaining an old automation system to avoid the huge cost, time and inconvenience of upgrading. Finally, inflexible automation systems often prevent companies from standardizing across their portfolio, ultimately requiring excessive training and resources.

SOLUTION

With TMS7, users and IT personnel will no longer have to install a TAS application on individual workstations. Instead, users can access TMS7 from all major web browsers and mobile devices. In addition, owners can always enjoy the latest features and security enhancements with upgrades (including major releases) that take less than 3 minutes, drastically reducing downtime and required resources. Finally, TMS7 is flexible enough to be the standard solution across most terminal portfolios.

BENEFITS OF A TMS7 SOLUTION

POWERFUL

Use TMS7 to view the status of all load racks, BOL print stations, driver staging areas, load bays, and more. TMS7 is full of new features that enable increased efficiency and productivity. For example, utilize Smartlinks throughout the site to quickly access key information; edit all your Master File Data from one page; and enjoy a faster more streamlined End of Day process with the modern user interface. In addition, easily manage co-mingled inventory owned by multiple stockholders using combined storage. Plus, every transaction supports tax codes for seamless operations.

RELIABLE

With TMS7, organizations will no longer have to plan lengthy outages or schedule infrequent updates. Instead, experience fast, easy upgrades which reduce upgrade time (including major releases) to **less than 3 minutes**! Also, enjoy additional disaster recovery options and greater control of hardware upgrades. Additionally, TMS7 offers high availability via hypervisor-level mirroring for a **fully redundant environment**. Use Product Quality Monitoring to ensure equipment failures and device inconsistencies aren't causing bad product quality to leave your facility. Plus, manage your stock and enjoy off-scale and on-scale measurements for trucks.

INTUITIVE

With a focus on allowing users to access information more efficiently than ever, TMS7 is almost like having an assistant. The TMS7 user interface is fast and intuitive, with better search capabilities, bulk changes, and multifunctional pages. Enjoy simplified workflows for important processes like Master File Data entry, bulk and non-bulk transaction entry, editing field attributes, and more. Utilize EDI management to provide your customers and their customers with easy access to transaction information. Plus, easily translate TMS7 into any language.

SECURE

TMS7 offers superior security with faster security patch deployments, easy control of user access through Active Directory Integration, and improved tools for system administration and troubleshooting. Customize field requirements in **less than 30 seconds** with no additional coding (CR). Get OS packages completely independent of Toptech, including simplified security patches. For those that choose, enjoy OS licensing completely within your IT's control. Toptech will continue to confirm patches that address critical issues.

AN INDUSTRY LEADER IN AUTOMATION AND DATA MANAGEMENT

Toptech Systems is a global industry leader in automation and data management services. All of our products are designed in-house allowing us to provide excellent customer service to our clients at all levels of the supply chain.
