CENTRALIZED PORTFOLIO MANAGEMENT

Tophat7 is a centralized solution for companies that own multiple terminals. Tophat7 brings managing a suite of terminals to a whole new level, offering a significant boost in productivity, a user-friendly interface, superior security and fast, easy upgrades. It handles complex data translation and routing requirements between terminal sites and the corporate back-office. Tophat7 also serves as a Data Warehouse, Allocations Management, Stock Management, and Dispatched Order Management solution. Tophat7 is designed to fit easily into your corporate IT strategy, providing the ideal location for corporate-wide data queries and reporting.

PROBLEM

Large companies with multiple terminals often have to log in to the terminal automation system for each individual site, making it difficult to efficiently manage their business. Even when a company has a system for managing the portfolio, it is often not fully integrated with the terminal automation systems. Plus, it lacks important security standards and features for enhanced portfolio management.

SOLUTION

Tophat7 allows the user to manage data to and from multiple terminal automation and hosted systems into one centralized system, making it possible for business owners to manage all aspects of their business (including crude skids and bulk plants) from one location. Tophat7 is able to manage large-scale data in a very fast, reliable, and secure manner.

CONTACT US FOR GLOBAL SALES AND SUPPORT

www.toptech.com TLU - ToptechSales@idexcorp.com South, Central, and North America +1 (407) 332-1774 EMEA, Asia, and Oceania +32 (0)3 250 60 60

INTEGRATED & SECURE LARGE-SCALE DATA MANAGEMENT

- Centralized Lifting Controls
- Single point for host interfaces
- Centralized reporting for corporate-wide queries
- · Allows data to be downloaded from ERP and routed to appropriate terminals
- Maintain key terminal data (even historical data) in one place without increasing ERP costs
- Manages data for company owned and 3rd party facilities
- Provides an intuitive user-interface for increased efficiency, scalability, and security.
- Reduce infrastructure and IT costs with one, simplified interface
- Provides added convenience and security with user management through Active Directory
- Reverse maintenance for lockouts / control
- Fast, easy security patches through the Cyber Security Compliance Program

TWO MANAGEMENT OPTIONS

TOPTECH MANAGED

• Turn-key system staged, shipped and supported by Toptech (same basic model used with previous versions)

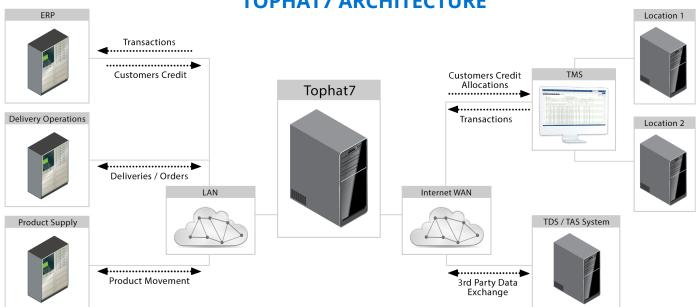

CUSTOMER MANAGED

• Toptech supplies Tophat7 image (including 3rd party components) that can be imported into customer virtualized environment
